Always start with a wider nozzle and a lower pressure

setting if you're unsure, and gradually increase if needed. Refer to the [nozzle guide](#) in your manual for specific recommendations.

Water Supply and Hose Management

A consistent and adequate water supply is crucial for your pressure washer's performance. Ensure your garden hose is of sufficient diameter (at least 3/4 inch) and length, and that the water source is turned on fully. Avoid using excessively long or narrow hoses, as these can restrict water flow and reduce pressure. Proper management of your high-pressure hose, including avoiding kinks and sharp bends, will also prevent premature wear and potential bursts.

Understanding Detergents and Cleaning Solutions

While water under pressure is powerful, certain cleaning tasks benefit greatly from the use of detergents. Your [Coleman Powermate 2500 PSI detergent usage](#) guidelines will specify compatible cleaners. Always use detergents specifically designed for pressure washers, as household cleaners can damage the pump or seals. Apply detergent on a low-pressure setting (usually with the black soap nozzle) and allow it to dwell for a few minutes before rinsing thoroughly with clean water. Never allow detergents to dry

on the surface.

Environmental Considerations

Responsible use extends to environmental awareness. Be mindful of where the wastewater is going, especially when using detergents. Avoid spraying directly into storm drains or waterways. If cleaning a large area, consider using containment methods to collect and dispose of wastewater properly. Always follow local regulations regarding wastewater disposal and chemical use.
