Beyond Deletion: Controlling Future Data Collection

Pausing Activity Controls

Within your Google Account's "Data & privacy" settings, you'll find "History settings." Here, you can pause the collection of:

- * **Web & App Activity:** This includes your search history, website activity from

Chrome (if synced), and activity from Google apps and services. * **Location History:** Stops Google from tracking where you go. * **YouTube Watch History:** Prevents YouTube from saving what you watch. * **YouTube Search History:** Stops YouTube from saving your search queries within the platform. When you pause these settings, Google will stop saving new activity. However, it won't delete data that has already been collected. You'll still need to go to My Activity to delete past entries.

Incognito Mode in Chrome

For temporary privacy without affecting your main account history, use Incognito mode in Chrome. When you browse in an Incognito window, Chrome won't save your browsing history, cookies, site data, or information entered in forms. However, remember that your activity might still be visible to: * Websites you visit. * Your employer or school (if you're using a network they manage). * Your internet service provider. To use Incognito mode: * **Desktop:** Click the three dots > "New Incognito window." * **Mobile:** Open Chrome, tap the three dots, then tap "New Incognito tab."

Frequently Asked Questions About Deleting Google History
