Volume XI, No. 1 (1961): Laying the Groundwork for a Year of Inquiry

The first issue of Volume XI sets the stage for the year's intellectual agenda. While specific article titles might require direct access to the archives, we can infer the likely thematic concerns based on the prevailing academic and political discourse. One can expect to find articles that:

The State of French Political Science: Methodological Debates and Theoretical Frameworks

A recurring feature in early volumes of the RFSP was the discussion surrounding the very nature of political science. The 1961 issues likely included debates on adopting quantitative methods, drawing from sociology and psychology, and the ongoing quest for a distinctly French contribution to the global discipline. Scholars would have been grappling with integrating new theoretical frameworks, such as structuralism and systems theory, into their analyses of French political phenomena.

Socio-Economic Transformations and their Political Implications

The economic "Trente Glorieuses" (Glorious Thirty) years were in full swing, but the benefits and challenges of rapid

industrialization and modernization were unevenly distributed. Articles in this issue might have explored the political ramifications of these socio-economic shifts, examining class structures, the role of labor unions, and the changing demographics of the French electorate. The impact of economic policy on political stability and governance would have been a key area of investigation.

Volume XI, No. 2 (1961): Navigating the Algerian Labyrinth and Decolonization

The Algerian War was a defining crisis of the era, and it's almost certain that this paramount issue occupied a significant portion of the journal's attention throughout 1961. The second issue would have likely featured:

The Political Dynamics of the Algerian War: Actors, Strategies, and Ideologies

Scholars would have dissected the complex interplay of political forces on both sides of the conflict. This could include analyses of the FLN's strategies, the French military's role, the political divisions within France regarding Algeria, and the emergence of new political movements seeking independence. The ethical and legal dimensions of decolonization, and the challenges of nation-building, would also have been crucial.

The Wider Impact of Decolonization on French Foreign Policy

Beyond Algeria, France was navigating its role in a world increasingly shaped by decolonization. Articles might have examined the implications for French relations with its former colonies in Africa and Southeast Asia, its standing in international organizations, and its evolving concept of its global influence. The concept of "Françafrique" and its underlying political and economic dynamics could have been an early subject of scrutiny.

Volume XI, No. 3 (1961): The Institutions of the Fifth Republic and Presidential Power

The establishment of the Fifth Republic in 1958 brought about a significant shift in French governance, with a strengthened presidency. The third issue likely delved into:

The Constitutional Framework of the Fifth Republic: Evolution and Functioning

This would involve detailed analyses of the new constitution, its institutional architecture, and how it was functioning in practice. Scholars would have been evaluating the powers of the President, the role of the Prime Minister, the relationship between the executive

and the legislature, and the impact of these changes on the broader political system. Key figures like Charles de Gaulle and his political philosophy would undoubtedly have been central to these discussions.

Presidentialism and the Concentration of Power: Debates on Democratic Legitimacy

The concentration of power in the presidency inevitably sparked debate about democratic accountability. Articles might have explored the potential for authoritarianism, the checks and balances in place, and the implications for citizen participation and representation. The evolving role of political parties and the electorate in this new institutional setting would also have been a crucial area of investigation.

Volume XI, No. 4 (1961): Comparative Politics, International Relations, and Emerging Trends

The final issue of the year would likely broaden the scope, looking beyond purely domestic French concerns to engage with broader theoretical and international trends.

Comparative Political Systems: Learning from Abroad

As French political science matured, so did its

engagement with comparative studies. Articles may have examined political systems in other European nations, the United States, or newly independent states, drawing parallels and contrasts with the French experience. This comparative approach would have been vital for understanding the uniqueness of the French model and for identifying potential areas for reform or innovation.

The Cold War and French Foreign Policy: Geopolitical Realities and Strategic Choices

The Cold War continued to shape global politics, and France, as a key NATO member and a nuclear power, was a significant player. Articles might have explored France's strategic alignment, its nuclear ambitions, its role in European integration, and its evolving relationship with both the United States and the Soviet Union. The impact of international alliances and power blocs on domestic policy decisions would also have been a key theme.

The Future of Political Science: Emerging Research Agendas and Intellectual Challenges

The concluding issue often serves as a retrospective and a look forward. One can imagine discussions on the burgeoning fields of political sociology, electoral studies, and public opinion research. The journal would have been reflecting on the intellectual challenges facing political scientists, the need for interdisciplinary collaboration, and the potential for new methodologies to unlock deeper

understanding of the political world.

Scholars examined the psychological and sociological dimensions of the conflict, as well as its implications for international law and human rights. The concept of nation-building and its challenges in post-colonial contexts were also implicitly or explicitly addressed.

The Functioning of the Fifth Republic

The nascent Fifth Republic was a primary focus of analysis. Researchers dissected the new constitutional framework, examining the powers of the President, the role of the government, and the transformation of parliamentary life. Debates likely revolved around the concentration of power, the effectiveness of semi-presidentialism, and the potential for authoritarian tendencies. Comparative political analysis, a growing field, would have been employed to understand France's unique system within a broader European and global context.

Political Behavior and Sociological Dimensions

The study of political socialization and the transmission of political values within families and educational institutions may have also featured. This focus on the micro-level of politics provided a counterpoint to macro-level institutional analyses.

International Relations and the Cold War

The global ideological struggle between the East and West, and the broader dynamics of international relations, were also significant areas of inquiry. Articles likely explored the nuances of superpower diplomacy, the proliferation of nuclear weapons, the impact of decolonization on the international stage, and the formation of alliances.
