Unleashing the Flow: How to Paint Waterfalls in Watercolor

There's something undeniably captivating about waterfalls. The sheer power, the delicate mist, the interplay of light and shadow – they're a timeless muse for artists. But capturing that dynamic energy and translucent quality in watercolor can feel like a daunting task. Fear not, aspiring watercolorists! This comprehensive guide will demystify the process of painting waterfalls, transforming that intimidating cascade into a rewarding creative adventure. We'll dive deep into the techniques, materials, and considerations that will help you create luminous and lifelike watercolor waterfalls. From understanding water's behavior to mastering washes and adding those crucial final touches, let's get your brushes ready to flow.

Why Waterfalls in Watercolor?

Watercolor, with its inherent transparency and fluid nature, is a perfect medium for capturing the essence of water. The way pigment bleeds and blends on wet paper can mimic the diffusion of light through water and the subtle shifts in color as it tumbles over rocks. Painting waterfalls in watercolor allows you to:

1. Explore the beauty of transparency and luminosity.
2. Master techniques like wet-on-wet and dry brush for dynamic effects.
3. Create a sense of movement and energy.
4. Evoke atmosphere and mood through color and light.

Gathering Your Watercolor Waterfall Toolkit

Before you even touch a brush, having the right supplies is essential. While you can get by with basics, a few specific tools will elevate your waterfall paintings.

Paper: The Foundation of Your Flow

The paper you choose will significantly impact how your watercolor behaves. For waterfalls, you'll want paper that can handle multiple washes and the occasional lifting of paint without buckling or disintegrating.

1. **Cold-press watercolor paper (140lb/300gsm or heavier):** This is the go-to for most watercolorists. Its textured surface holds pigment well and allows for beautiful washes. The heavier weight is crucial for preventing excessive buckling.
2. **Hot-press watercolor paper:** If you're aiming for very smooth water effects, hot-press paper might be an option, but it's less forgiving for washes and lifting.
3. **Rough watercolor paper:** This offers a more pronounced texture, which can be great for suggesting the texture of rocks or the foamy spray.

Brushes: Your Water-Carrying Companions

A variety of brush shapes and sizes will be your best friends.

1. **Round brushes (sizes 6-12):** Versatile for laying down washes, drawing lines, and creating details.
2. **Flat brushes (1/2 inch to 1 inch):** Excellent for broad washes, controlling edges, and creating those sweeping strokes.

of water.

3. **Rigger or liner brush:** Essential for painting those thin, energetic lines of falling water.
4. **Script liner brush:** Similar to a rigger, offering even finer lines.

Paints: The Palette of Nature's Hues

While you can paint a waterfall with a limited palette, having a good range of blues, greens, and earth tones will be beneficial.

1. **Blues:** Ultramarine Blue, Cerulean Blue, Cobalt Blue, Phthalo Blue (use sparingly, it's potent!).
2. **Greens:** Sap Green, Hooker's Green, Viridian.
3. **Earth Tones:** Burnt Sienna, Raw Umber, Yellow Ochre.
4. **White:** Titanium White or Zinc White (for highlights and opaque effects, though often reserved for very late stages or not used at all, relying on the white of the paper).

Other Essentials:

1. **Water containers:** Two are ideal – one for rinsing brushes and one for clean water to mix with paints.
2. **Paper towels or a clean rag:** For blotting excess water and paint from your brushes.
3. **Masking fluid:** To preserve highlights on the water or rocks.
4. **Palette:** For mixing your colors.
5. **Sponge:** For lifting color and creating texture.
6. **Drawing pencil (HB or 2B):** For a light sketch.

Understanding Water's Behavior: The Key to Realism

Before you even think about putting paint to paper, take a moment to observe real waterfalls. What do you see?

1. **Transparency:** How does light pass through the water? This is crucial for conveying depth and form.
2. **Movement:** Water isn't static. It flows, tumbles, splashes, and creates ripples.
3. **Light and Shadow:** Where does the light hit? Where are the shadows? These create contrast and define the shape of the cascade.
4. **Foam and Spray:** The interaction of water with rocks and air creates beautiful frothy textures.
5. **Reflections:** What does the water reflect from its surroundings?

Step-by-Step: Painting Your Watercolor Waterfall

Let's get painting! This is a general approach; feel free to adapt it to your style and the specific waterfall you're depicting.

Step 1: The Sketch - Laying the Groundwork

Keep your initial sketch light and loose. Focus on the main shapes: the overall form of the waterfall, the surrounding rocks, and any prominent trees or foliage. Don't get bogged down in tiny details. Think about the flow lines of the water and how it interacts with the landscape.

Step 2: Planning Your Whites - Preserving the Light

This is perhaps the most critical step in watercolor. The white of the paper is your brightest highlight. Decide where your strongest lights will be – on the crest of the water, on sunlit spray, or on the edges of the cascade.

1. **Masking Fluid:** For defined highlights like the crest of a wave or the gleam of light on wet rocks, apply masking fluid to these areas with a small brush or ruling pen. Let it dry completely before you start painting.
2. **Strategic Omissions:** For softer highlights or areas where you want a subtle glow, simply paint around them, leaving the white of the paper untouched.

Step 3: The First Washes - Building the Foundation

This is where the magic begins to happen. We'll work from light to dark and generally from background to foreground.

Painting the Sky and Background:

If your waterfall is set against a sky or distant trees, paint these areas first. Use loose, wet-on-wet washes to create a soft, atmospheric background. For skies, consider gradients of blues and perhaps some soft clouds. For distant foliage, use diluted greens and browns.

Painting the Rocks:

Rocks are rarely a single color. Observe their subtle variations.

1. **Wet-on-Wet for Texture:** Apply a light wash of a neutral color (like a diluted ochre or light gray) to the rock areas. While still wet, drop in other colors like umbers, siennas, and even a touch of blue or green to suggest moss or dampness. Let the colors mingle and create natural variations.
2. **Allow to Dry:** Let these washes dry completely before moving to the water.

Step 4: The Water - Capturing the Flow

This is where the excitement builds!

Painting the Main Body of the Water:

Work with your main water colors. For the main cascade, you'll likely be using a range of blues and greens, but remember to consider the light.

1. **Wet-on-Wet for Transparency:** Apply a wash of your lightest water color (e.g., diluted Cerulean Blue or a light green) to the areas of the waterfall where light is hitting. While this wash is still damp, drop in slightly darker blues and greens to suggest the depth and shadow within the water. Let the colors blend organically.
2. **Think in Layers:** You'll likely need multiple layers to build up the depth and translucency of the water. Don't try to achieve perfect color in the first wash.

Creating the Falling Water Effect:

This is where you bring in the dynamic movement.

1. **Rigger Brush and Dry Brush:** Once the main washes of water have dried to a damp or semi-dry state, switch to your rigger or script liner brush. Dip it into a slightly more concentrated version of your water color and use quick, vertical strokes to create the illusion of falling water. Vary the thickness and pressure of your strokes to suggest different currents.
2. **Dry Brush Technique:** For areas of white water or spray, you can use a very dry brush with a small amount of paint. Lightly drag it across the paper to create a broken, frothy texture.

Step 5: Adding Details and Defining Form

Now you'll refine your waterfall and the surrounding elements.

Defining Edges:

Use a slightly damp brush with a bit more pigment to define the edges where the water meets the rocks. This creates contrast and separation.

Adding Shadows:

Deepen the shadows within the water and on the rocks. Use more concentrated blues, greens, and earth tones for this. Consider how the water might be casting shadows on itself or the surrounding rocks.

Foam and Spray:

This is where you can really make your waterfall come alive.

1. **Lifting Technique:** While the water washes are still damp, you can use a clean, damp brush or a sponge to gently lift out areas of color, creating softer, more diffused foam.
2. **Opaque White:** For bright, sharp highlights of foam or spray, you can carefully apply small touches of opaque white paint (gouache or opaque watercolor) with a fine brush. Use this sparingly to avoid making it look artificial.
3. **Dry Brush for Texture:** As mentioned before, dry brush can be effective for creating frothy textures.

Step 6: Refining and Final Touches

Step back and assess your painting.

1. **Adjust Values:** Are the darks dark enough? Are the lights light enough? Make any necessary adjustments to contrast.
2. **Strengthen Details:** Add any final details to the rocks, foliage, or water that will enhance the realism and energy of your painting.
3. **Remove Masking Fluid:** Once everything is completely dry, gently rub off the masking fluid to reveal your preserved highlights.
4. **Glazing:** For subtle shifts in color or to unify areas, you can apply thin glazes of transparent color over dry layers.

Troubleshooting Common Waterfall Painting Pitfalls

Even with the best intentions, you might encounter some common challenges.

The Water Looks Flat and Opaque:

This often happens when you're not layering enough or not preserving enough of the white of the paper. Try to work in multiple transparent layers and be mindful of where your light sources are.

The Rocks Look Like Brown Blobs:

Remember to observe the subtle color variations in rocks. Introduce different earth tones, grays, and even hints of blue or green. Use wet-on-wet techniques to create natural color mingling.

The Movement Isn't Conveyed:

Focus on the direction and flow of the water. Use your rigger brush for dynamic lines and dry brush for energetic spray. Vary the thickness and direction of your strokes.

Too Much White Paint:

Overuse of opaque white can make watercolor look chalky and lose its transparency. Reserve white for the brightest, sharpest highlights and explore techniques that preserve the white of the paper or use lifting.

Tips for Success

* **Study References:** Collect photos of waterfalls that inspire you. Observe the light, the textures, and the movement. * **Practice Small:** Before tackling a large, complex waterfall, practice individual elements like water splashes, foam, or rock textures on scrap paper. * **Embrace the Unexpected:** Watercolor has a mind of its own. Sometimes the happy accidents are what make a painting unique and beautiful. * **Don't Be Afraid to Lift:** Lifting color while the paint is still damp is a powerful technique for creating soft highlights and foam. * **Work Dark to Light (Mostly):** While watercolor is transparent, it's generally easier to add darker colors over lighter ones. However, you can lift out lighter areas. * **Patience is a Virtue:** Watercolor takes time. Allow layers to dry appropriately between steps. Painting waterfalls in watercolor is a journey of exploration. It's about observing, experimenting, and learning to harness the beautiful fluidity of the medium. With practice and a keen eye for detail, you'll soon be creating breathtaking cascades that seem to shimmer and flow right off your paper.

So, grab your brushes, mix your colors, and let the water guide your artistic flow! The result will be a testament to the power and beauty of nature, captured in your own unique style.

Painting waterfalls in watercolor is an art form that captures both the dynamic motion and serene stillness of flowing water, requiring a delicate balance between technique and observation. Water, with its ever-shifting reflections, transparency, and fluid movement, presents a unique challenge and opportunity for artists seeking to bring natural landscapes to life on paper. Successfully rendering waterfalls involves not only technical skill but also an understanding of light, texture, and atmosphere, allowing the painter to evoke the cool, rhythmic energy of cascading water. At the heart of waterfall watercolor painting lies mastering the fluidity of the medium itself. Watercolor's transparency and ability to blend seamlessly make it ideal for capturing the soft glimmers and misty veils that define water in motion. The key is to embrace the medium's unpredictability—allowing washes to flow and bleed naturally while guiding them with intentional marks that suggest motion without overcontrol. Layering transparent glazes helps build depth, enabling layers of blue, turquoise, and hints of green to mimic the depth of pools beneath the falls and the mist rising from the rushing cascade. Understanding light and shadow is essential. The interplay between sunlight glinting on the surface and the cool blues and greens of shadowed rock faces creates contrast that brings a waterfall to life. Observing how light fractures through droplets and ripples allows the artist to infuse vibrancy and dimension. Capturing reflections in still water—distorted, mirrored images of the fall itself—adds a layer of realism and poetic beauty, inviting viewers into the scene. The applications of waterfall watercolor paintings extend beyond personal expression. They serve as stunning artistic studies for landscape artists, inspiration for nature photography and digital art, and powerful visual storytelling tools in environmental awareness campaigns. Whether used to illustrate a journal entry, a book cover, or a gallery exhibition, these works connect people with the tranquil yet powerful force of nature, fostering appreciation for the world's most captivating water features. The benefits of painting waterfalls in watercolor are manifold. The medium's fluid nature encourages mindfulness, turning each brushstroke into a meditative act that enhances focus and creativity. The process fosters patience and adaptability, as the artist learns to respond to the paint's behavior rather than impose rigid control. Over time, this approach nurtures a deeper connection to nature, encouraging artists to observe their surroundings with greater attention and empathy. Looking to the future, waterfall watercolor painting continues to evolve with new techniques and digital tools. Artists increasingly blend traditional watercolor with digital enhancement, expanding creative possibilities while preserving the organic charm of the medium. As environmental consciousness grows, waterfall paintings gain renewed significance—serving not only as artistic expressions but also as visual reminders of the beauty and fragility of natural ecosystems. This enduring relevance ensures that watercolor waterfalls will remain a cherished subject, inspiring generations to capture the timeless dance of water with skill, sensitivity, and wonder.

Waterfalls are majestic natural wonders, embodying movement, light, and the raw power of nature. Capturing their ephemeral beauty in watercolor is a challenge that delights and frustrates artists in equal measure. But with the right techniques and a keen understanding of how watercolor behaves, you too can paint breathtaking cascades. This comprehensive guide will delve into the intricacies of 'how to paint waterfalls in watercolor', from understanding light and shadow to mastering brushstrokes and color mixing. Whether you're a beginner artist or seeking to refine your skills, this article will equip you with the knowledge to bring your watercolor waterfalls to life.

Understanding the Essence of Waterfalls in Watercolor

Before we even pick up a brush, it's crucial to grasp what makes a waterfall visually compelling. It's not just about a sheer drop of water; it's about the interplay of light reflecting off the surface, the textures of the falling and splashing water, the surrounding environment, and the overall mood you wish to convey.

The Illusion of Movement

Watercolor, with its translucent nature, is uniquely suited to depicting the fluidity of water. The key is to create an illusion of movement through skillful application of pigment and white space. This involves understanding how light interacts with the water as it falls, splashes, and collects.

Light and Shadow Play

Waterfalls are dynamic scenes bathed in light. Identifying the light source and understanding how it affects the water's surface is paramount. Highlights will dance on the crests of waves, while deeper shadows will form within the churning spray and behind the main flow. This contrast is what gives your waterfall depth and realism. Think about the bright, almost luminous quality of sunlit water versus the muted tones of shaded areas.

Texture and Form

A waterfall isn't a monolithic block of white. It's a symphony of textures: the smooth, glassy surface of still pools, the foamy exuberance of the plunge pool, and the delicate mist that hangs in the air. Achieving these textures requires varying your brushstrokes, using different brush types, and employing specific watercolor techniques.

Essential Watercolor Materials for Painting Waterfalls

While any watercolor set can be used, certain materials can make the process smoother and more effective. Investing in quality supplies will significantly impact the final outcome of your watercolor painting.

Paper Selection

The foundation of any watercolor painting is the paper. For waterfalls, which involve a lot of water and potentially wet-on-wet techniques, a heavier paper is essential. Aim for **cold-press watercolor paper** with a weight of 140lb (300gsm) or higher. Cold-press paper has a slight texture that holds water well and allows for layering without buckling or tearing. For smoother water effects, a hot-press paper might be considered, but cold-press generally offers more versatility for capturing varied textures.

Brush Choices

A good selection of brushes is key to capturing different elements of a waterfall.

1. **Large Round or Wash Brush:** For laying down broad washes of color for the sky, background, and larger areas of water.
2. **Medium Round Brush:** Versatile for painting the main body of the waterfall, creating edges, and adding mid-tones.
3. **Small Round Brush:** Essential for fine details, like delicate spray, individual water droplets, and highlights.
4. **Flat Brush (optional):** Can be useful for creating sharp horizontal lines or for specific texturing effects.

Natural hair brushes (like sable) are excellent for holding a lot of water and pigment, but high-quality synthetic brushes can also perform admirably.

Pigment Palette

While specific colors depend on the environment, a basic palette for waterfalls often includes:

1. **Blues:** Ultramarine Blue, Cobalt Blue, Cerulean Blue (for sky and water).
2. **Greens:** Sap Green, Hooker's Green, Permanent Green (for surrounding foliage and rocks).
3. **Earth Tones:** Burnt Sienna, Raw Umber, Yellow Ochre (for rocks and earthy tones).
4. **White:** Titanium White (or a good opaque white gouache for final highlights, though many watercolorists prefer to preserve the white of the paper).
5. **Black (used sparingly):** Payne's Grey or Indigo can be used to deepen shadows.

Remember, watercolor is about transparency, so mixing colors to achieve the desired transparency is crucial. Using a limited palette can also help create a cohesive feel to your painting.

Step-by-Step Guide to Painting Waterfalls in Watercolor

Now, let's dive into the practical application of these principles. This process is a general guideline; feel free to adapt it to your personal style and the specific waterfall you're painting.

1. Preliminary Sketch and Composition

Start with a light pencil sketch. Focus on the main shapes of the waterfall, the surrounding rocks, trees, and any other key elements. Consider the rule of thirds to create a balanced and visually interesting composition. Think about the direction of the water flow and where the most dramatic elements will be placed. This initial drawing will act as your roadmap.

2. Laying the Background and Sky

Begin with the lightest elements. If you have a sky above the waterfall, paint that first using wet-on-wet technique for a soft, blended effect. Use diluted blues and perhaps some soft grays or pinks for a sunset. Allow this to dry completely before moving on to the surrounding landscape. For the background foliage and rocks, use washes of greens and earth tones, keeping them slightly softer and less detailed than the foreground elements.

3. Establishing the Water's Flow (The Main Wash)

This is where you begin to define the waterfall itself. Mix a light to mid-tone wash of your chosen water color (often a mix of blues and grays, or even a hint of green if it's surrounded by lush vegetation). Use a large brush and apply the wash in the direction of the water's flow. For the main falling water, you'll want to preserve the white of the paper for the brightest highlights, so carefully paint around those areas or use masking fluid (discussed later) if you prefer. For areas where the water is turbulent or less illuminated, you can add your diluted color.

4. Building Up Layers and Values

As the initial wash dries, start building up darker values and introducing more texture. This is where the illusion of depth and movement really starts to form.

1. **Adding Shadow:** Mix darker shades of your water color and apply them where shadows would naturally occur – behind the main flow, in the deeper parts of the cascade, and at the base of the rocks. Use a smaller brush for more controlled application.
2. **Creating Texture:** Use a variety of brushstrokes to suggest the different textures of water.
 1. **Lifting:** While the paint is still damp, you can use a clean, damp brush or a paper towel to lift out highlights, creating the look of sparkling water.
 2. **Dry Brush:** For areas of foam and spray, use a dry brush with a small amount of paint. Drag the brush lightly across the paper to create broken, textured lines that mimic the chaotic nature of splashes and mist.
 3. **Splattering:** For fine mist and spray, load a brush with diluted paint and flick it towards the paper. You can control the size and intensity of the splatters by varying the amount of paint and water on your brush.
3. **Rock Details:** Paint the rocks surrounding the waterfall. Use darker, more saturated colors and varied brushstrokes to suggest their rough texture. Don't be afraid to leave some areas lighter to represent where water has splashed onto them.

Continue to layer and refine, always thinking about where the light is coming from and how it interacts with the water and the surrounding environment. Remember, watercolor often looks best when built up in thin, transparent layers.

5. Refining Details and Highlights

This is the stage where your waterfall painting truly comes alive.

1. **Sharp Edges:** Define the edges of the falling water where it meets the rocks or the air. Use a smaller brush and slightly darker or more saturated colors.
2. **Intensifying Highlights:** Use a small, fine-tipped brush to add the brightest highlights. These are often pure white, achieved by preserving the paper's white. If you've accidentally covered a highlight, you can try lifting it carefully, or in some cases, use a tiny amount of opaque white gouache as a last resort.
3. **Spray and Mist:** Use the dry brush and splattering techniques to add delicate spray and mist. These elements are crucial for conveying the dynamic nature of a waterfall. Think about the direction the spray is moving.
4. **Subtle Touches:** Add any final touches, such as subtle reflections in pools of water, darker accents in crevices, or richer greens in the foliage.

Step back frequently to assess your work. Look for areas that need more contrast, more detail, or where the illusion of movement could be enhanced.

Advanced Watercolor Techniques for Waterfalls

For those looking to push their watercolor skills further, several advanced techniques can elevate your waterfall paintings.

Using Masking Fluid

Masking fluid (or frisket) is an indispensable tool for preserving pure white highlights. Apply it with an old brush or a ruling pen to the areas you want to remain white **before** you start painting. Once your painting is completely dry, rub off the masking fluid to reveal the untouched paper. This is particularly useful for capturing sharp, bright highlights on water spray or the crest of a waterfall.

Salt and Water Techniques

Sprinkling coarse salt onto wet watercolor washes can create interesting textured effects, mimicking the appearance of churned water or foamy splashes. Experiment with different salt sizes and densities for varied outcomes. You can also use plastic wrap, crumpled and pressed onto wet paint, to create unique patterns.

Gouache for Opaque Whites

While purists strive to preserve the white of the paper, sometimes opaque white gouache is the most practical way to achieve brilliant highlights, especially on darker washes or when lifting techniques don't yield the desired result. Use it sparingly for the brightest points of light.

Common Challenges and Solutions

Painting waterfalls in watercolor can be tricky. Here are some common issues and how to address them.

Making Water Look Too Static

Solution: Vary your brushstrokes. Use a combination of wet-on-wet for soft blends, dry brush for texture, and lifting for highlights. Introduce small, broken lines to suggest movement. Don't be afraid to use a range of values to create dynamism.

Overworking the Painting

Solution: Know when to stop. Watercolor can easily become muddy if overworked. Build up colors in layers and trust the transparency of the medium. Sometimes, less is more. Step away from your painting for a while to gain fresh perspective.

Achieving Realistic Whites

Solution: Preserve the white of the paper as much as possible. Use masking fluid for critical highlights. If you miss a highlight, practice lifting techniques. As a last resort, use opaque white sparingly.

Conclusion

'How to paint waterfalls in watercolor' is a journey of observation, experimentation, and practice. By understanding the principles of light, shadow, and movement, choosing the right materials, and employing effective watercolor techniques, you can create stunning representations of these natural marvels. Don't be discouraged by initial challenges; each painting is a learning experience. Embrace the fluidity of watercolor, experiment with different approaches, and most importantly, enjoy the process of bringing the power and beauty of waterfalls to life on your paper.

Questions & Answers About how to paint waterfalls in watercolor

No	Question	Answer
1	What's the best way to capture the movement of water in a watercolor waterfall?	Use loose, flowing brushstrokes and vary the pressure. Employ wet-on-wet techniques for soft, blended edges and splattering for mist or spray effects. Think about the direction the water is flowing and mimic that with your brushwork.
2	How do I create the illusion of depth in a watercolor waterfall painting?	Use atmospheric perspective. Paint the background elements (trees, rocks) lighter and with less detail, fading into the background with cooler colors. Bring the foreground elements forward with warmer, more saturated colors and sharper details. The water itself can also be layered to show depth.
3	What colors are best for painting realistic watercolor waterfalls?	It's not just blue! Think about reflected light and surroundings. Blues and greens are common for water, but don't forget earthy browns and grays for rocks, and greens and yellows for surrounding foliage. Consider warm undertones from the sky or surrounding landscape to add realism.
4	How can I paint the white of the water and spray in watercolor without using white paint?	The key is to preserve the white of the paper. Use masking fluid to protect areas that will be bright white, like highlights on water or spray. Alternatively, paint around these areas, building up the darker tones of the water and surroundings. Glazing with thin washes can also subtly build light.
5	What kind of brushes are essential for painting watercolor waterfalls?	A variety is helpful. A large wash brush (like a flat or mop) is great for laying in broad areas of water. A medium round brush is good for controlling strokes and adding details. Smaller detail brushes are useful for fine lines and highlights. A stiff-bristled brush can be used for splattering.
6	How do I avoid making my watercolor waterfall look flat and muddy?	Focus on value. Create strong contrasts between light and dark areas. Build up layers gradually, letting them dry in between. Don't overwork the paint, which can lead to muddy colors. Use transparent washes to maintain luminosity.
7	What are some common mistakes beginners make when painting watercolor waterfalls, and how can I avoid them?	Overusing blue, not considering light and shadow, and painting everything the same color are common. Avoid them by studying reference photos, focusing on value shifts, and using a broader color palette reflecting the environment. Practice preserving the white of the paper.
8	How do I paint the rocks around a watercolor waterfall to make them look wet and textured?	Use a variety of grays, browns, and even some muted greens. Apply washes of color while the paper is still damp for softer transitions. Use drier brushstrokes and add dark accents to create texture and shadow. Consider the way light hits the rocks and paint those highlights.
9	What's the best approach for painting the 'splash' and 'foam' elements of a watercolor waterfall?	For controlled splashes, use a smaller brush with less water to create sharp accents. For more diffuse foam or mist, consider splattering with a toothbrush or stiff brush. Lifting techniques (gently lifting wet paint with a clean brush or paper towel) can also create softer foam effects.
