

The tragedy of great power politics

The Tragedy of Great Power Politics: A Complex Dance of Power and Conflict The interplay of global powers has shaped history, often resulting in devastating consequences. From the Peloponnesian War to the Cold War, the pursuit of dominance by great powers has invariably led to conflict and suffering. This explores the "tragedy of great power politics," delving into its core principles, historical examples, and the enduring challenges it presents to global stability. We'll examine the inherent tensions, the limitations of diplomacy, and the potential for catastrophic outcomes.

Understanding the Core Concept: The Tragedy of Great Power Politics

The tragedy, as articulated by scholars like Kenneth Waltz and others, isn't simply about the inevitable clash between competing nations. It's about the

fundamental tension between the necessary actions of states pursuing their interests and the unavoidable risk of catastrophic outcomes. This tension arises from several key factors:

1. The Anarchical Nature of the International System

Unlike domestic politics, where a central authority governs interactions, the international system is anarchic. There's no overarching power to enforce rules or punish aggression. This absence of a global government necessitates states to rely on self-help, often leading to a security dilemma where actions taken to enhance one state's security can be perceived as threatening by others. This creates a cycle of mistrust and potential conflict.

2. The Security Dilemma and the Pursuit of Power

States constantly seek to enhance their security. However, these efforts, while often defensive in nature, can be interpreted as aggressive by other states. This security dilemma is exacerbated by the pursuit of power, which can be both defensive (maintaining a strong military to deter attacks) and

offensive (building a military to dominate rivals). The line between these two often blurs, leading to unintended escalation.

3. Rationality and the Limits of Foresight

While states often act rationally in their own perceived best interests, the complex interactions within the international system often transcend individual rationality. States may make decisions based on incomplete information or miscalculations, leading to unforeseen consequences. The lack of perfect foresight exacerbates the inherent risks.

Historical Case Studies: The Echoes of Tragedy

History is replete with examples of the tragedy of great power politics.

The Cold War: A Nuclear Standoff

The Cold War between the US and the USSR demonstrates the dangers of the security dilemma and the pursuit of power. Both superpowers engaged in an arms race, creating a nuclear stalemate that

held the world hostage. The Cuban Missile Crisis stands as a stark reminder of the potential for miscalculation and catastrophic conflict.

The Peloponnesian War: The Seeds of Conflict

This ancient Greek conflict underscores how the pursuit of power and influence can lead to devastating wars. The fear of decline and the desire for hegemony created tensions that culminated in a lengthy and destructive war, highlighting the inherent dangers of great power competition.

Modern Conflicts: A Continuation of the Theme

Contemporary conflicts, from the Russo-Ukrainian War to tensions in the South China Sea, reflect the enduring legacy of great power politics. These conflicts demonstrate the persistence of the security dilemma and the importance of understanding the motivations and actions of other powers.

Potential Benefits (Limited): A

Conjectural Lens

While acknowledging the inherent tragedy, some argue that the competition between great powers can lead to positive outcomes, such as technological innovation, economic growth, and the fostering of new ideas. However, these potential benefits are often overshadowed by the potential for catastrophic consequences.

- **Potential for technological advancement:** Competition can drive innovation in military technology and other sectors.
- Economic growth: The drive for dominance may stimulate economic activity within competing states.
- *Cultural exchange*: Interactions between great powers can foster cultural exchange and understanding.

Navigating the Complexities: Strategies for Mitigation

Addressing the tragedy of great power politics requires a multi-faceted approach:

Diplomacy and Negotiation

Building trust and understanding through open communication and negotiation is crucial. Diplomacy can help de-escalate tensions, facilitate cooperation,

and manage disagreements constructively.

International Institutions

Stronger international institutions, such as the UN, can help to facilitate dialogue, enforce rules, and provide mechanisms for conflict resolution.

Understanding and Counteracting Cognitive Biases

Recognizing and mitigating cognitive biases that can lead to miscalculations and misinterpretations of other states' actions are important.

navigating the intricacies of great power dynamics and mitigating the risks of conflict.

The Tragedy of Great Power Politics: A Cycle of Conflict and Miscalculation

The world stage, often a grand theater of diplomacy and cooperation, can just as easily transform into a brutal arena where nations vie for dominance. This, in essence, is the concept of "great power politics" - the pursuit of national interests, security, and influence by the most powerful states on the planet. While it can foster periods of relative stability, its inherent nature often leads to a tragic cycle of competition, miscalculation, and, ultimately, conflict.

Understanding this tragedy is crucial to navigating the complexities of international relations and, perhaps, finding a more peaceful path forward.

Defining Great Powers and Their Stakes

First, let's establish what we mean by "great powers." These aren't just any nations; they are states

possessing significant military, economic, and diplomatic might. Think of historical giants like the Roman Empire, the British Empire, or the United States and China in the contemporary era. Their decisions and actions ripple across the globe, influencing smaller nations and shaping the international order. The stakes for great powers are immense. For them, security isn't just about defending their borders; it's about maintaining their standing, ensuring their economic prosperity, and projecting their values and ideologies. This can manifest as a desire for "hegemony" – a dominant position in the international system – or at least a balance of power that favors their interests. When great powers feel their position is threatened, or when they perceive an opportunity to enhance it, the wheels of great power politics begin to turn, often with devastating consequences.

The Security Dilemma: A Self-Fulfilling Prophecy

At the heart of the tragedy of great power politics lies the "security dilemma." This concept, central to international relations theory, explains how the actions taken by one state to increase its security can, paradoxically, decrease the security of other states.

Imagine a great power building up its military capabilities. From its perspective, this is a purely defensive measure, a necessary step to protect itself from potential threats. However, rival great powers, observing this buildup, might interpret it as an aggressive move, a sign that their adversary is preparing for war. In response, these rival powers will likely increase their own military spending and strengthen their alliances. This, in turn, further fuels the original state's sense of insecurity, leading to an escalating spiral of arms races and heightened tensions. It's a classic case of a self-fulfilling prophecy: each state's attempt to feel more secure makes everyone, including themselves, less secure. The Cold War, with its nuclear brinkmanship and proxy wars, is a stark historical example of the security dilemma in action. Both the United States and the Soviet Union felt genuinely threatened by the other's military advancements, leading to a decades-long standoff that brought the world to the precipice of nuclear annihilation.

The Allure of Expansion and the Fear of Decline

Great powers are also driven by both the allure of expansion and the fear of decline. Historically,

powerful states have often sought to expand their territorial influence, secure vital resources, and establish spheres of influence. This expansion can be driven by economic motives, a desire for strategic depth, or a belief in their own civilizational superiority. The scramble for colonies during the imperial era, for instance, was a clear manifestation of this expansionist impulse. However, the flip side of expansion is the deep-seated fear of decline. Great powers are acutely aware that their dominance is not eternal. They see other rising powers and worry about losing their privileged position. This fear can lead to desperate measures, an attempt to shore up their power by any means necessary, even if it involves aggressive foreign policy. The decline of empires, from the Roman Empire to the Ottoman Empire, is a recurring theme in history, and the anxiety surrounding such a decline can fuel instability and conflict as a great power attempts to cling to its status. This dynamic can also be seen in contemporary great power competition, where established powers may feel threatened by emerging economic and military giants.

Miscalculation and the Fog of War

Another tragic element of great power politics is the

pervasive role of miscalculation. Leaders, operating under immense pressure and often with incomplete or biased information, can make crucial errors in judgment. They might misinterpret the intentions of their rivals, underestimate their resolve, or overestimate their own capabilities. The "fog of war," a term coined by Prussian military theorist Carl von Clausewitz, describes the uncertainty and confusion that envelop battlefield decision-making. However, this fog extends far beyond the battlefield, obscuring the true intentions and potential consequences of actions on the diplomatic and strategic fronts. The outbreak of World War I is a prime example of catastrophic miscalculation. A regional conflict in the Balkans escalated into a global conflagration due to a complex web of alliances, nationalist fervor, and a series of flawed assumptions by the leaders of the great European powers. Each nation believed it could achieve a swift victory and that war would ultimately serve its interests, a miscalculation that led to unprecedented bloodshed and the collapse of empires. In today's interconnected world, with advanced communication technologies, one might assume miscalculations are less likely. However, the sheer speed of information dissemination, coupled with the potential for disinformation and propaganda,

can create new and complex pathways for misunderstanding and unintended escalation.

The Interplay of Domestic Politics and Foreign Policy

It's also crucial to recognize that great power politics doesn't occur in a vacuum. Domestic politics within great powers significantly influence their foreign policy decisions. Leaders may feel pressure from their own populations to appear strong, to protect national pride, or to secure economic benefits through international engagement. Sometimes, foreign policy is used as a tool to distract from domestic problems or to consolidate political power. This interplay between domestic and international affairs can lead to policies that are driven more by internal imperatives than by a rational assessment of external realities. A leader might engage in aggressive posturing to appeal to nationalist sentiments at home, even if such actions increase the risk of conflict abroad. The desire to project an image of strength and resolve on the international stage can override more cautious and diplomatic approaches. Understanding the internal political dynamics of great powers is therefore essential to grasping the motivations behind their actions and the potential for tragic outcomes.

The Illusion of a Stable Balance of Power

Throughout history, statesmen have sought to establish and maintain a "balance of power." The idea is that by distributing power relatively evenly among the major players, no single state can become dominant enough to threaten the others. While periods of balance have indeed brought relative peace and stability, the concept itself can be a source of tragedy. The pursuit of a balance of power can lead to dangerous alliances and counter-alliances, creating rigid blocs that are easily drawn into conflict. It can also incentivize pre-emptive strikes, as states fear that their rivals might gain an advantage if they wait too long. Furthermore, the "balance" is rarely perfect and is constantly shifting. As powers rise and fall, the equilibrium is disrupted, leading to periods of instability and increased competition as states jockey for position to re-establish their preferred order. The Concert of Europe, established after the Napoleonic Wars, aimed to maintain a balance of power, but its eventual breakdown contributed to the conditions that led to World War I.

Beyond the Tragedy: Towards a More Cooperative Future?

While the history of great power politics is undeniably a tragic one, it's not necessarily a deterministic fate. The very awareness of this tragedy can be the first step towards transcending it. Several factors offer a glimmer of hope: * **Increased Interdependence:** Today's globalized world means that great powers are more economically and socially intertwined than ever before. War and widespread conflict would be devastating for all involved, creating a strong incentive for cooperation. * **International Institutions:** Organizations like the United Nations, despite their limitations, provide forums for dialogue, dispute resolution, and the development of international norms. They offer a counterpoint to the raw power struggles of traditional great power politics. * **Shared Global Challenges:** Issues like climate change, pandemics, and economic instability transcend national borders. Addressing these challenges effectively requires cooperation among great powers, forcing them to look beyond narrow self-interest. * **The Power of Non-State Actors:** The rise of non-governmental organizations, civil society groups, and influential individuals can also play a role in promoting peace and advocating for more

cooperative approaches. However, these hopeful signs are constantly challenged by the enduring dynamics of great power politics. The allure of unilateral action, the temptation of zero-sum thinking, and the ever-present security dilemma continue to exert their influence.

Conclusion: Learning from History, Shaping the Future

The tragedy of great power politics is a recurring narrative in human history. It is a story of ambition, fear, miscalculation, and the devastating consequences that arise when the pursuit of national interest eclipses the imperative of global cooperation. Understanding the security dilemma, the dynamics of expansion and decline, the pitfalls of miscalculation, and the influence of domestic politics is crucial to recognizing the patterns that have led to conflict. While the future is uncertain, the lessons of the past offer a path towards mitigating these tragic outcomes. By fostering dialogue, strengthening international institutions, embracing interdependence, and recognizing our shared humanity, we can strive to build a world where great powers compete not through the threat of force, but through the pursuit of common prosperity and lasting peace. The challenge

is immense, but the stakes – the very future of humanity – demand our sustained attention and commitment to finding alternatives to the tragic logic of great power politics.

The Tragedy of Great Power Politics: A Persistent Paradox

Great power politics has long shaped the course of human history, defining alliances, fueling rivalries, and determining the fate of nations. At its core lies a paradox: the pursuit of national strength and global influence often undermines the very stability and prosperity it aims to secure. This enduring tension, often described as the tragedy of great power politics, reveals how ambition and fear, when intertwined with sovereignty and security, create cycles of competition that threaten peace.

Understanding the Historical Foundations

The roots of great power rivalry stretch back to ancient empires and colonial expansions, but the modern era crystallized this dynamic. From the balance-of-power struggles in 19th-century Europe to

the ideological clash of the Cold War, great powers have repeatedly sought to assert dominance, often at the expense of smaller nations and regional stability. The tragedy emerges not merely from conflict itself, but from the failure to recognize that unchecked power accumulation destabilizes the international order. Each pursuit of dominance—whether through military might, economic leverage, or technological supremacy—triggers reciprocal moves by rivals, escalating tensions and narrowing diplomatic space.

This self-reinforcing cycle reveals a deeper human and structural challenge: the difficulty of cooperation among actors driven by sovereignty and survival instincts. Unlike smaller states that rely on alliances for protection, great powers often prioritize self-reliance, even when collective action would yield greater long-term benefits. The result is a world where deterrence and brinkmanship replace dialogue, and mutual suspicion overshadows shared interests. The tragedy lies not only in war and sanctions but in the lost opportunities for mutual advancement that such polarization prevents.

Key Insights: Power, Perception,

and Paranoia

One critical insight is the role of perception in great power dynamics. Leaders and publics alike interpret actions through lenses of threat and opportunity, fueled by historical memory, national identity, and strategic culture. A defensive posture may be seen as offensive by a rival, triggering overreactions that spiral into confrontation. This cognitive distortion deepens mistrust and reduces the bandwidth for negotiation.

Another key insight is the economic dimension of modern great power competition. While military strength remains vital, economic interdependence and technological innovation have introduced new battlegrounds—semiconductors, artificial intelligence, and energy security—where dominance promises not just material gain but geopolitical leverage. This shift complicates traditional deterrence models, as economic tools like sanctions or trade restrictions can cause severe harm without direct conflict, yet fail to resolve underlying strategic anxieties. The tragedy thus evolves: power is no longer just about war and peace, but about control over the levers of global innovation and supply chains.

Applications in Contemporary Geopolitics

Today, the tragedy of great power politics manifests in regions and rivalries across the globe. The intensifying competition between the United States and China exemplifies this dynamic, where economic interdependence coexists with strategic rivalry over trade, technology, and military presence in the Indo-Pacific. Europe's evolving role, especially in light of Russia's aggression, underscores how traditional security arrangements must adapt to multipolar pressures. Meanwhile, India, Brazil, and other emerging powers navigate a changing order, seeking autonomy while managing great power expectations.

These realities demand nuanced diplomacy—efforts to build trust, manage escalation, and create frameworks for cooperation even amid competition. Yet the shadow of historical distrust and the urgency of national pride often hinder progress. The tragedy persists because each power, acting rationally in its own interest, contributes to a broader instability that no single actor can resolve alone.

Benefits of Recognizing the Tragedy

Acknowledging the tragedy opens pathways to more sustainable international relations. By understanding that unchecked power competition breeds insecurity, policymakers can prioritize confidence-building measures, transparent communication, and multilateral institutions designed to de-escalate tensions. Recognizing shared vulnerabilities—climate change, pandemics, nuclear risks—can serve as common ground, redirecting focus from zero-sum rivalry to collective resilience.

Furthermore, this awareness fosters internal reflection within nations. It challenges leaders to balance national ambition with global responsibility, encouraging policies that secure long-term prosperity without provoking conflict. Civil society, too, benefits from this lens, enabling informed public discourse on foreign policy and promoting civic engagement in shaping peaceful international engagement. Ultimately, embracing the tragedy as a shared challenge strengthens the foundation for a more stable and cooperative world.

The Future Outlook: From Competition to Coexistence

The future of great power politics will hinge on whether humanity can transcend the tragedy through intentional transformation. While power competition is unlikely to disappear—nations will continue to pursue security and influence—the rising complexity of global challenges demands new forms of collaboration. Technological advancement, climate urgency, and economic interdependence create incentives for cooperation, even among rivals.

Success will depend on evolving diplomatic mindsets: moving beyond zero-sum thinking toward integrative strategies that align national interests with global stability. Institutions must adapt to multipolarity, and leaders must cultivate strategic patience, empathy, and foresight. The tragedy need not be inevitable; it is a cautionary story that, when heeded, can guide a more balanced and hopeful era. The path forward requires courage—not merely to wield power, but to restrain it, and wisdom to recognize that true strength lies not in domination alone, but in fostering a world where great powers thrive together, not at each other's expense.

The Tragedy of Great Power Politics: An Enduring Cycle of Conflict and Missed Opportunity

The grand stage of international relations is often dominated by the machinations of [great powers](#). These states, possessing significant economic, military, and diplomatic clout, inevitably shape the global order. Yet, history is replete with a recurring, somber narrative: the tragedy of great power politics. This isn't a single, isolated event, but rather an enduring cycle characterized by intense competition, inherent suspicion, and a pervasive tendency towards conflict, often at immense human and material cost. Understanding this tragedy requires delving into its root causes, examining its manifestations across different eras, and considering the persistent challenges to achieving lasting peace in a world structured by power disparities.

The Bedrock of Pessimism: Realism and the Security Dilemma

At the heart of the tragedy of great power politics lies the dominant theoretical framework of [realism](#). Realist scholars, from Thucydides to Hans Morgenthau, posit

a world characterized by anarchy – the absence of a supranational authority capable of enforcing rules and ensuring security. In such a system, states are fundamentally driven by self-interest and the pursuit of power, primarily for the sake of survival. This inherent insecurity breeds a profound sense of [mistrust](#) and [suspicion](#) between states, particularly those at the apex of the international hierarchy.

This dynamic fuels what is known as the [security dilemma](#). Actions taken by one great power to enhance its own security – be it increasing military spending, forming alliances, or developing new technologies – are often perceived by its rivals as inherently threatening. This perception, even if the intentions are purely defensive, compels the rival state to respond in kind, leading to a spiral of [arms races](#) and escalating tensions. The tragedy lies in the fact that both powers might genuinely desire peace and stability, yet their pursuit of security in an anarchic system inadvertently drives them towards conflict. The [Cold War era](#), with its nuclear brinkmanship and proxy wars, stands as a stark testament to the relentless logic of the security dilemma.

The Lure of Hegemony and the Balance of Power

The pursuit of dominance is another potent driver of great power tragedy. Some great powers harbor ambitions of [hegemony](#) – establishing themselves as the undisputed preeminent power, capable of setting the rules of the game for the entire international system. This ambition is met with fierce resistance from other great powers who fear being subjugated or marginalized. This leads to the formation of [balances of power](#), where coalitions of states emerge to counter the rising influence of a potential hegemon. While intended to maintain stability by preventing any single power from becoming too dominant, the dynamics of balancing can be inherently destabilizing. The constant jockeying for position, the formation and dissolution of alliances, and the ever-present threat of miscalculation can easily tip the scales towards war.

Historically, the Concert of Europe, established after the Napoleonic Wars, was an attempt to manage great power relations through a collective balancing mechanism. However, it ultimately succumbed to nationalist pressures and the rise of new powers, leading to the devastating conflicts of the 20th century. The interwar period, characterized by a

fragile balance and the revisionist ambitions of Germany and Japan, tragically demonstrated how a weakened or disrupted balance of power can pave the way for global catastrophe. Even in the post-Cold War era, the question of [unipolarity](#) versus multipolarity continues to shape great power dynamics and anxieties.

Misperception, Miscalculation, and the Fog of War

Beyond structural factors, the human element plays a crucial role in the tragedy of great power politics. Leaders, operating under immense pressure and often with incomplete or biased information, are prone to [misperception](#) and [miscalculation](#). The "fog of war," a term coined by Carl von Clausewitz, describes the inherent uncertainty, confusion, and fear that pervades conflict situations, making rational decision-making exceptionally difficult. In the high-stakes environment of great power competition, even a minor misjudgment can have catastrophic consequences.

The assassination of Archduke Franz Ferdinand, the spark that ignited World War I, is a classic example. Underlying diplomatic failures, rigid alliance systems, and the aggressive posturing of great powers were all

present, but it was the chain of miscalculations and escalatory decisions following the assassination that propelled Europe into an abyss. Similarly, the [Cuban Missile Crisis](#) brought the world to the precipice of nuclear war, highlighting how quickly tensions can escalate when leaders misinterpret each other's intentions or underestimate the risks involved. The importance of [diplomatic channels](#) and effective communication between great powers cannot be overstated in mitigating these risks.

Internal Factors: Domestic Politics and Leadership

The tragedy of great power politics is not solely an external phenomenon. Internal factors within great powers significantly influence their foreign policy and propensity for conflict. Domestic political considerations, such as the need to rally public support, satisfy powerful interest groups, or project an image of strength, can push leaders towards more assertive or aggressive foreign policies. [Nationalism](#), in particular, can be a powerful mobilizing force, often exploited by leaders to legitimize ambitious foreign policy goals, even at the expense of peace.

The quality of leadership also plays a pivotal role.

Visionary leaders who prioritize de-escalation and cooperation can steer their nations away from the precipice. Conversely, leaders driven by ideology, personal ambition, or a rigid worldview can exacerbate tensions and lead their countries into disastrous confrontations. The role of [ideology](#), as seen in the ideological rivalry of the Cold War, can further entrench animosity and make compromise exceedingly difficult, contributing to the tragic outcomes.

Economic Competition and the Scramble for Resources

While military power and security concerns often dominate discussions of great power politics, [economic competition](#) is an equally significant, and often intertwined, driver of tension. As great powers vie for [global markets](#), [natural resources](#), and technological superiority, their interests can clash, leading to trade wars, protectionist policies, and proxy conflicts over access to vital commodities. The [Scramble for Africa](#) in the late 19th century, driven by imperial ambitions and the desire for raw materials and new markets, is a prime historical example of how economic competition can fuel great power rivalries and contribute to instability.

In the contemporary era, competition over critical minerals, energy supplies, and technological dominance, particularly in areas like artificial intelligence and semiconductors, carries similar potential for friction. The pursuit of [economic dominance](#) can be as dangerous as the pursuit of military supremacy, as it can lead to zero-sum thinking and a willingness to employ coercive measures to secure national economic interests.

The Enduring Nature of the Tragedy and the Hope for Change

The tragedy of great power politics is not a relic of the past; it is a persistent feature of the international system. The anarchic structure of global politics, the inherent security dilemma, the temptations of power, and the fallibility of human decision-making all contribute to an enduring cycle of competition and conflict. The question is not whether these dynamics exist, but how to mitigate their tragic consequences.

While the prospects for a complete eradication of great power conflict might seem bleak, there are avenues for mitigating its severity. Strengthening [international institutions](#), fostering [multilateralism](#), promoting [transparency](#) in military activities, and

investing in robust [conflict resolution](#) mechanisms are crucial. Cultivating a global norm that prioritizes diplomacy, cooperation, and shared security over zero-sum competition is essential. Furthermore, promoting [global governance](#) frameworks that address shared challenges like climate change and pandemics can create opportunities for cooperation that transcend traditional power rivalries.

Ultimately, overcoming the tragedy of great power politics requires a fundamental shift in mindset – a recognition that in an interconnected world, the security and prosperity of one great power are inextricably linked to those of others. It demands a commitment to dialogue, a willingness to compromise, and a persistent effort to build trust in a system perpetually shadowed by the specter of conflict. The alternative, as history grimly illustrates, is a cycle of immense suffering and missed opportunities for collective progress.

2	Who is the main proponent of this theory, and what's their key work?	John J. Mearsheimer is the primary proponent, and his seminal work is 'The Tragedy of Great Power Politics' (2001).

3	How does Mearsheimer explain the drive for power among great powers?	He argues it stems from the pursuit of hegemony (dominance) for survival. Since no great power can be certain of another's intentions, they seek to maximize their own power to deter potential threats.
4	Does this theory suggest war is inevitable?	While it doesn't claim war is absolutely inevitable, it suggests that great power competition and the risk of war are endemic to the international system due to the structural pressures on states.
5	What's the difference between Mearsheimer's theory and a more optimistic view of international relations?	Optimistic views often emphasize cooperation, international institutions, and shared interests. Mearsheimer's theory is pessimistic, highlighting structural constraints that promote competition and mistrust, making cooperation difficult and potentially temporary.

6	How does 'defensive realism' differ from Mearsheimer's 'offensive realism' regarding great power ambitions?	Defensive realism suggests states primarily seek enough power to be secure, not to dominate. Mearsheimer's offensive realism argues states, even if initially content, are incentivized to seek as much power as possible, ideally hegemony, for ultimate security.
7	Can you give a historical example that supports the tragedy of great power politics?	The build-up to World War I is often cited. Despite no single power arguably desiring war initially, a complex web of alliances, security dilemmas, and power competition led to escalating tensions and ultimately, a devastating conflict.
8	What are some common criticisms of Mearsheimer's theory?	Criticisms include overemphasizing power and military competition, underestimating the role of ideas and domestic politics, and potentially failing to account for long periods of relative peace among great powers.

9	How does the tragedy apply to current international relations, like US-China relations?	The theory suggests the US and China are locked in a dangerous competition for regional and global dominance. Their actions, even if intended to be defensive, are likely to be perceived as offensive by the other, fueling mistrust and potential conflict.
10	If the tragedy is inherent, what can great powers do to mitigate it?	While the theory offers a bleak outlook, mitigation strategies might include cautious diplomacy, avoiding unnecessary provocations, focusing on maintaining a balance of power rather than seeking absolute dominance, and understanding the security dilemmas of rivals.
