Key Areas Covered by the SMR References Sourcebook

The APICS SMR References Sourcebook, in its essence, touches upon virtually every critical facet of modern operations and supply chain management. While the exact list of references may evolve with each iteration of the APICS curriculum, the core subject areas remain consistent. These typically include:

Master Production Scheduling (MPS) and Demand Management

This foundational area focuses on how organizations plan what to produce and when. It involves understanding sales and operations planning (S&OP), forecasting techniques, and how to translate demand into a feasible master production schedule. The SMR likely references works that detail various forecasting models (e.g., time series, causal), demand shaping strategies, and the importance of accurate demand data in driving the entire supply chain.

Material Requirements Planning (MRP) and Capacity Planning

Once the MPS is established, MRP systems are used to determine the quantities of raw materials, components, and subassemblies needed to meet production schedules. Capacity requirements planning (CRP) ensures that the necessary resources (labor, machinery) are available. The SMR will point to resources that explain the logic of MRP, bill of materials (BOM) management, lead time calculations, and the intricacies of matching capacity to demand.

Inventory Management and Control

A significant portion of supply chain costs is tied up in inventory. The SMR References Sourcebook will draw from literature that covers various inventory management strategies, including economic order quantity (EOQ) models, safety stock calculations, ABC analysis, cycle counting, and the impact of inventory on working capital. Understanding how to balance inventory levels to meet demand while minimizing costs is a core competency highlighted by these references.

Shop Floor Control and Production Activity Control (PAC)

This area focuses on the execution of the production plan. It involves managing work orders, tracking production progress, and ensuring that operations run smoothly on the shop floor. References here would likely cover shop floor data collection, scheduling techniques, and methodologies for improving production efficiency and throughput.

Purchasing and Supplier Management

Effective sourcing and supplier relationships are critical for a resilient supply chain. The SMR will reference materials that cover procurement processes, supplier selection, contract negotiation, strategic sourcing, and building collaborative relationships with suppliers. This is crucial for managing inbound logistics and ensuring the timely availability of necessary inputs.

Distribution and Logistics

The movement of goods from the point of production to the end customer is a vital part of the supply chain. References in

this domain cover warehousing, transportation management, inventory placement, order fulfillment, and network design. Understanding the principles of efficient and cost-effective distribution is key to customer satisfaction.

Lean and Six Sigma Principles

These methodologies are fundamental to continuous improvement and operational excellence. The SMR will likely include references to works that explain the core tenets of lean manufacturing (e.g., waste reduction, value streams, pull systems) and Six Sigma (e.g., DMAIC, statistical process control) as applied to supply chain operations. These principles are essential for driving efficiency and quality.

Theory of Constraints (TOC)

TOC is a management philosophy that focuses on identifying and managing the most critical limiting factor (the constraint) in any system. The SMR may reference works that explain how to apply TOC principles to production and supply chain environments to improve flow and overall system performance.

Global Supply Chain Management

As supply chains become increasingly global, understanding international trade, customs, regulations, and risk management becomes essential. The SMR may reference resources that address the complexities of managing supply chains across different countries and cultures.
