What is an FCC ID? Demystifying the Code

Before we get into the specifics of K7GMHBCJ, let's quickly recap what an FCC ID is. The FCC (Federal Communications Commission) is an independent agency of the United States government responsible for regulating interstate and international communications by radio, television, wire, satellite, and cable. Any electronic device that emits radio frequency (RF) energy, even unintentionally, must be authorized by the FCC before it can be legally sold or imported into the United States. This authorization

process ensures that these devices don't interfere with other essential radio services, like emergency communications or aviation. The FCC ID is a unique identifier assigned to each piece of equipment that undergoes this authorization. It typically consists of two parts: * ****Grantee Code:**** The first three characters (in our case, K7G) identify the company that applied for the authorization (the grantee). * ****Product Code:**** The remaining characters (in our case, MHBCJ) are assigned by the grantee to identify a specific product. So, when you see "K7GMHBCJ," you know it's a Motorola product (grantee code K7G) with a specific designation (product code MHBCJ).
