2	How can I effectively prepare for the CBSE Class 12 Physics practical exam, especially the viva voce section?	Thoroughly understand the theory behind each experiment, the apparatus used, and potential sources of error. Practice performing experiments neatly and accurately. For the viva, be prepared to explain your observations, calculations, and the practical applications of the concepts.

3	What are common mistakes students make in the Physics lab, and how can I avoid them?	Common mistakes include incorrect readings, faulty connections, improper handling of instruments, and errors in calculations. Always double-check your connections, take multiple readings, and be careful with sensitive equipment. Understand the least count of each instrument.
4	Where can I find reliable resources for understanding the CBSE Class 12 Physics laboratory manual experiments?	Your school's prescribed lab manual is the primary resource. Additionally, reputable educational websites, YouTube channels dedicated to physics education, and study guides often provide clear explanations and demonstrations of these experiments.
5	How important is the neatness and presentation of my lab record for CBSE Class 12 Physics?	Neatness and proper presentation are crucial. A well-organized lab record with clear diagrams, accurate readings, calculations, and observations demonstrates your understanding and attention to detail, which is often a significant part of your practical assessment.
6	What if I don't understand a particular experiment in the CBSE Class 12 Physics lab manual?	Don't hesitate to ask your physics teacher for clarification. They are there to guide you. You can also discuss it with classmates or refer to supplementary resources that explain the experiment in a different way.
7	How do I draw accurate and labeled diagrams for my CBSE Class 12 Physics lab experiments?	Use a ruler for straight lines and a compass for circles. Label all parts of the apparatus clearly and unambiguously. Ensure the diagram accurately represents the experimental setup described in your lab manual.

8	What kind of errors should I be aware of and discuss in my CBSE Class 12 Physics lab report?	Focus on understanding 'personal errors' (like parallax error) and 'instrumental errors' (due to calibration issues). Also, discuss 'random errors' (unpredictable variations) and 'systematic errors' (consistent deviations). Mentioning and analyzing these demonstrates critical thinking.
