3	What kind of algebraic questions are usually asked in a Class 7 maths quiz?	Class 7 quizzes often test basic algebraic expressions and equations. For example: 'Solve for x: $3x + 7 = 22$ ' or 'Simplify the expression: $2(a + 3b) - (a - b)$ '.
4	How can I prepare for questions involving integers and their operations?	Practice makes perfect! Work through problems involving addition, subtraction, multiplication, and division of integers. Pay close attention to the rules of signs (e.g., negative times negative is positive) and use a number line to visualize operations if needed.
