Essential Supplies to Accompany Your Meter

Once you have your Accu-Chek Aviva or Compact Plus system, you'll need a few essential supplies to keep your blood glucose monitoring running smoothly: ****Accu-Chek Test Strips:**** These are specific to your meter model (Aviva or Compact Plus). Ensure you purchase the correct type. ****Accu-Chek Lancets:**** Used with the lancing device to obtain a blood sample. ****Control Solution:**** This is a liquid that contains a known concentration of glucose. It's used to check the accuracy of your meter and test strips, ensuring they are working correctly. It's

recommended to use control solution periodically, especially when opening a new vial of test strips or if you suspect your meter is not performing accurately. *

****Lancing Device:**** While the Compact Plus has one integrated, the Aviva typically requires a separate lancing device. * ****Carrying Case:**** To keep your meter, test strips, lancets, and other supplies organized and protected, especially when traveling.

Note down any relevant information like meals, exercise, or medication taken. * ****Analyze Your Data:****

Look for patterns in your blood glucose readings. Are there certain foods that consistently raise your sugar levels? Does exercise have a significant impact? *

****Communicate with Your Doctor:**** Share your monitoring data with your healthcare team. This information is invaluable for them to help you fine-tune your treatment plan. * ****Stay Informed:**** Continue to educate yourself

about diabetes management. There are many resources available online, from patient advocacy groups to official health organizations.
