2. **How to play:**
 1. Deal the entire deck face down, evenly between two players.
 2. Both players flip over their top card simultaneously.
 3. The player with the higher card wins both cards and adds them to the bottom of their pile.
 4. If the cards are equal, it's "War!" Each player places three cards face down, then one face up. The player with the higher face-up card wins all the cards in the pile.
 5. The game ends when one player has all the cards.
3. **Math skills practiced:** Comparing numbers, addition (to determine the winner in some variations or if you want to make it harder), number recognition.

One of the most effective approaches is breaking chapters into smaller, manageable sections. Large blocks of information can be overwhelming and reduce focus. Dividing content into sections encourages gradual progress and helps learners absorb information step by step. After completing each section, summarizing the content in your own words is highly recommended. Summaries help clarify understanding and reinforce key concepts. Writing brief notes or outlines based on Maths Games To Play At Home content enables learners to process information actively rather than passively consuming it. These summaries can later serve as quick revision materials before exams or discussions.

Regularly reviewing highlighted sections is another essential study practice. Highlights draw attention to important ideas, definitions, or arguments that require reinforcement. Digital highlights remain accessible and searchable, making review sessions more efficient than flipping through physical pages.
