Getting Started: Logging In and Basic Navigation

The first hurdle is often just getting into the system. Don't overthink it!

Logging In to EpicCare Ambulatory

Your organization will have provided you with specific login credentials. Typically, this involves a username and password. It's crucial to keep these confidential and follow your organization's policies regarding password security. You might also encounter multi-factor authentication (MFA), which adds an extra layer of security, such as a code sent to your phone or a biometric scan. Once you've successfully logged in, you'll be greeted by the EpicCare Ambulatory homepage.

Understanding the EpicCare Ambulatory Interface

The interface can seem a bit overwhelming at first, but it's designed for logical navigation. Let's break down some common elements you'll see: *

Your Daily Workflow in EpicCare Ambulatory

As an ambulatory nurse, your day likely involves several core tasks. Let's explore how EpicCare Ambulatory supports them.

Finding and Accessing Patient Charts

This is probably your most frequent action. * **Patient Search:** The patient search function is your best friend. You can typically search by MRN, patient name, date of birth, or even partial information. Accurate searching is vital to avoid accessing the wrong chart. Double-check the patient's name and DOB before proceeding. * **MyChart/Patient Portal Access:** You might also have access to view patient-submitted information from their MyChart account, providing valuable insights into their self-reported symptoms and concerns.

Managing Appointments and Schedules

Keeping track of patient appointments is crucial for a smooth clinic flow. * **Schedule View:** EpicCare Ambulatory usually provides a schedule view that displays your assigned patients for the day, including appointment times, provider, and reason for visit. * **Adding to Schedule:** If you're responsible for adding patients to the schedule, familiarize yourself with the process for selecting the correct appointment

type, provider, and duration.

Pre-Visit Preparation and Documentation

Before the patient even arrives, you can often prepare. * **Reviewing Upcoming Appointments:** Take a moment to review your schedule for the day. Look for patients with specific needs or those who haven't had recent visits. * **Pre-Chart Review:** Accessing the patient's chart before the visit allows you to review their history, medications, and any outstanding orders or messages. This proactive approach can save time during the encounter. * **Gathering Supplies:** Based on the appointment type, you might be able to anticipate needed supplies or equipment and have them ready.

During the Patient Encounter: Efficient Charting

This is where EpicCare Ambulatory truly shines, but also where efficiency is paramount. * **Vital Signs Documentation:** You'll likely be responsible for taking and documenting vital signs. Look for the dedicated flowsheets or input screens. Ensure you're entering the correct units and time. * **Medication Reconciliation:** A critical nursing task. You'll be comparing the patient's current medications with their home medication list and making necessary adjustments or updates within the system. * **Entering Assessments and Progress Notes:** Whether it's a brief update or a detailed nursing assessment, learn how to utilize templates or free-text fields to document your findings. Many organizations utilize "smart phrases" or macros to quickly insert common phrases and sentences. * **Ordering and Managing Labs, Imaging, and Referrals:** You may be tasked with placing orders for diagnostic tests or referrals to specialists. Familiarize yourself with the order entry process, including selecting the correct order, specifying details, and ensuring all required fields are completed. * **Patient Education Documentation:** Documenting the

education you provide to patients about their conditions, medications, or treatments is essential. Look for specific sections or fields dedicated to patient education. * **Utilizing SmartPhrases and Templates:** If your organization uses them, smart phrases (shortcuts for commonly used text) and templates can dramatically speed up your documentation. Learn the specific smart phrases available to you. * ***"At Risk" Flags and Alerts:** Be mindful of any alerts or flags that appear in the patient's chart (e.g., fall risk, isolation precautions). These are crucial for patient safety and require specific interventions and documentation.

Post-Visit Tasks and Communication

Your work isn't done when the patient leaves the exam room. *

Completing Outstanding Orders: Ensure all orders placed during the visit are finalized and sent to the appropriate departments. * **In-Basket Messaging:** This is your primary communication tool within EpicCare Ambulatory. You'll use it to communicate with physicians, other nurses, and support staff. Learn to prioritize and respond to messages promptly.
