Questions & Answers About how to check computer specs

No	Question	Answer
1	What are the 'must-know' computer specs for gaming and why?	For gaming, focus on your Graphics Card (GPU) for visual performance, Processor (CPU) for game logic and speed, and RAM for smooth multitasking and loading. The more powerful these are, the better your gaming experience will be, allowing for higher frame rates and graphical settings.

2	I'm buying a new laptop. How can I quickly check if it's powerful enough for my needs without getting too technical?	Look for the processor type (e.g., Intel Core i5/i7 or AMD Ryzen 5/7 are good for general use), RAM amount (8GB is minimum, 16GB is better for multitasking), and storage type (SSD is much faster than HDD). For specific software, check its minimum and recommended system requirements and compare them to the laptop's specs.
3	How do I find out what kind of graphics card my computer has?	On Windows, press `Windows Key + X` and select 'Device Manager'. Expand 'Display adapters' to see your graphics card listed. Alternatively, you can right-click on your desktop, select 'Display settings', then scroll down to 'Advanced display settings' and look for 'Display adapter properties'.
4	My computer is running slow. How can I check its specs to see if it needs an upgrade?	To check your CPU and RAM on Windows, press `Ctrl + Shift + Esc` to open Task Manager, then go to the 'Performance' tab. This shows your processor type, speed, and current RAM usage. If your RAM is consistently near 100% usage or your CPU is always maxed out, an upgrade might be beneficial.
5	What's the difference between RAM and storage, and how do I check both?	RAM (Random Access Memory) is your computer's short-term memory for active tasks, while storage (like an SSD or HDD) is for long-term file saving. On Windows, you can see RAM in Task Manager's 'Performance' tab (as mentioned above). To check storage, open File Explorer, right-click on 'This PC', and select 'Properties' for an overview of your system and storage size. For more detail, click on drives within 'This PC'.

6	Is there an easy way to see my computer's specs without digging through multiple menus on Windows 10/11?	Yes! Type 'System Information' into the Windows search bar and open the app. It provides a comprehensive overview of your hardware and software, including your processor, RAM, operating system, motherboard, and even graphics card, all in one place.
